Vasanth Muthoju

Frontend Engineer

Hyderabad, Telangana, India | vasanth.muthoju143@gmail.com | +91-9398221602
LinkedIn | GitHub

Professional Summary

Frontend Engineer experienced in developing and maintaining enterprise web applications using React, TypeScript, JavaScript, and modern UI libraries. Skilled in frontend architecture migration, REST API integration, reusable component development, application state management, and performance-conscious UI engineering. Experienced in collaborating with backend engineers to resolve integration issues, improve rendering and data-fetching workflows, and deliver responsive, maintainable user experiences across multi-module SaaS applications.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks: React.js, React Router, Vite, Bootstrap
UI and Styling: Tailwind CSS, Radix UI, shadcn/ui, Material UI, Responsive Design, Flexbox, CSS Grid
State and APIs: React Hooks, React Context API, TanStack React Query, Axios, REST API Integration, Custom Hooks
Performance Optimization: React.memo, useMemo, useCallback, Lazy Loading, Code Splitting, Debouncing, Lighthouse
Forms and Visualization: React Hook Form, Zod, Recharts, Lucide React, Framer Motion
Tools: Git, GitHub, npm, ESLint, Prettier

Professional Experience

Frontend Engineer **Sep 2025 – Present**
Sysrek InfoSolutions | Hyderabad, Telangana, India

- Develop and maintain enterprise web applications using React, TypeScript, JavaScript, Tailwind CSS, and reusable UI components.
- Translate UI designs and business requirements into responsive, maintainable interfaces with consistent layouts and interactions.
- Integrate REST APIs using Axios and dedicated service modules, collaborating with backend engineers on request payloads, response structures, authentication, and permissions.
- Refactor frontend implementations, troubleshoot integration issues, and optimize component rendering and data-handling workflows to support responsive application experiences.
- Collaborate with cross-functional teams to deliver features, resolve UI defects, and maintain frontend code quality.

Frontend Development Intern **Mar 2025 – Jun 2025**
Naresh i Technologies | Hyderabad, India

- Developed a job-search platform with interfaces for browsing job opportunities and accessing job-related information.
- Built reusable frontend components and responsive layouts to provide a consistent user experience across screen sizes.
- Refined UI rendering, styling, and page layouts to improve interface responsiveness, usability, and maintainability.
- Tested and debugged interactive workflows to improve functional reliability and the overall user experience.

Projects

Stark Pharma – Recruitment Management Platform
React.js, JavaScript, Tailwind CSS, React Router, Axios

- Developed recruitment interfaces covering applicant tracking, candidate and job management, recruiter administration, vendor management, and client relationships.
- Built reusable React components, responsive dashboards, forms, data tables, and interactive recruitment workflows.
- Integrated REST APIs through service modules and React Context to support candidate management, interview scheduling, recruiter workflows, and analytics interfaces.
- Improved frontend efficiency through reusable components, streamlined data handling, and responsive UI refinements across recruitment modules.

Taskly – Project Management SaaS Platform
React.js, TypeScript, React Router, Vite, Tailwind CSS, Axios

- Migrated an existing Inertia.js and React frontend to a standalone React and TypeScript application using Vite and React Router, replacing Inertia-specific navigation and page handling.
- Collaborated with the backend developer to integrate Django REST Framework APIs and align request/response structures, authentication, and permission-based workflows.

- Integrated frontend functionality across projects, tasks, bug tracking, timesheets, invoices, expenses, budgets, contracts, workspaces, and user administration.
- Refactored API services, streamlined data handling, and resolved integration issues to improve frontend reliability, maintainability, and application responsiveness.

SysTrack – Enterprise IT Asset Management System
React.js, TypeScript, Tailwind CSS, TanStack React Query, Axios
- Developed frontend modules for IT asset inventory, categorization, assignments, transactions, maintenance, and document management.
- Built reusable components, data tables, forms, dialogs, search, pagination, and dashboard interfaces for asset lifecycle management.
- Integrated REST APIs and used TanStack React Query for asynchronous data fetching, mutations, and query-cache management.
- Improved frontend efficiency through reusable UI patterns, structured data-fetching workflows, and optimized handling of asset lists and dashboard data.

SysDox – Enterprise Document Management System
React.js, JavaScript, Tailwind CSS, Axios, React Hook Form
- Developed document and folder management interfaces for uploads, sharing, archival, retention, and document lifecycle workflows.
- Built reusable forms, data tables, dialogs, and interfaces for workflow automation, OCR-related functionality, AI-assisted document generation, and document search.
- Integrated backend APIs for document operations, user management, workflow-related features, and audit interfaces.
- Refined component reuse, document-list rendering, and API-driven data handling to support maintainable interfaces and responsive document management workflows.

SS QuantumEdge – Corporate Website
HTML5, CSS3, JavaScript, Bootstrap, jQuery
- Developed the Our Team section and updated selected website pages while maintaining the existing design and styling conventions.
- Fixed UI issues and refined spacing, alignment, styling, and responsive layouts to improve visual consistency and usability.
- Refined page-level CSS and responsive layouts to improve rendering consistency across screen sizes.

Education

Bachelor of Technology (B.Tech), Computer Science Engineering 2023
Malla Reddy Engineering College
